AU Hub — Gold Trading CRM

A custom-built system for managing investor accounts, expenses, gold trade records, and automated profit & loss with per-investor profit sharing.

SCOPE OF WORK DELIVERED

Investor Management	Add, edit, deactivate, or remove investors; each gets an auto-generated username & password on creation.
Investor Portal	Secure read-only login per investor — sees only their own profit share, never another investor's, while every loss stays visible to all.
Expense Tracking	Built-in headers (Flight, Travel, Visa, Hotel) plus unlimited custom headers; payment slips / invoices attach as image or PDF.
Expense Attribution	Any expense can be tagged to an investor, or charged directly against that investor's share alone.
Gold Trade Ledger	Purchases and sales recorded by quality/purity, weight, and rate per gram.
Profit & Loss Engine	Automatic daily and overall accounts — stock on hand, gross profit, net profit after expenses, total loss, net loss.
Profit Split by %	Profit and loss divided across investors automatically by their agreed percentage share.
Dashboard & Reports	Profit trend chart, expense breakdown, investor split table, CSV export.
Responsive & Secure	Works on desktop, tablet and phone; role-based login with encrypted passwords and session authentication.
Hosting Setup	Deployed live on a basic hosting plan (limited resources) so the system is reachable online.

- Domain name registration — client's own cost
- Ongoing maintenance, support, or new feature requests after handover

TOTAL — ONE-TIME PAYMENT

AED 2,500.00

100% due on delivery / handover

System is built and running — handover on receipt of payment

TERMS

1. This quotation is valid for **30 days** from the date above.
2. Price covers the system as built and demonstrated; scope changes beyond the modules listed may be quoted separately.
3. Hosting setup is on a basic/limited plan to get the system live; a domain name is not included and is purchased separately by the client.
4. No ongoing support is included in this price. Any changes, fixes, or new features requested **after handover** will be quoted and charged separately at that time.

Thank you for the opportunity to build your system.
